START

Mr. Roger F. Stanley, Program Manager
State of Washington
Department of Ecology
Mail Stop PV-11
Olympia, Washington 98504-8711

Dear Mr. Stanley:

REVISION TO THE HANFORD SITE DANGEROUS WASTE PART A PERMIT APPLICATION
(WA7890008967)

Enclosed are the Dangerous Waste Part A Permit Applications for the following waste management units:

- o 242-A Evaporator (Evaporator) (Enclosure 1)
- o 200 East Area Liquid Effluent Retention Facility (200 E LERF) (Enclosure 2)
- o 216-A-37-1 Crib (Crib) (Enclosure 3)
- o 207-A South Retention Basin (Basin) (Enclosure 4)

The contents of the enclosed Part A permit applications reflect discussions held with you and your staff over the last several weeks.

The revised Dangerous Waste Part A Permit Application for the Evaporator incorporates additional dangerous waste codes to reflect the dangerous waste the Evaporator receives and treats from the Double-Shell Tanks. In addition, the Part A permit application incorporates the dangerous waste determination of the Evaporator process condensate effluent stream.

The new Part A permit application for the 200 E LERF is being submitted to meet pre-construction permitting requirements. This permit application indicates that the 200 E LERF is a new facility being constructed under interim status expansion.

The Part A permit applications for the Crib and the Basin indicate that these two units were taken out of service on April 12, 1989, and that closure plans will be negotiated for their final disposition. This disposition is consistent with our discussions on Land Disposal Restrictions relative to these units.

Mr. R. F. Stanley
